PLANNING TO MOVE CATTLE?
Do you need to Pre-Movement Test your cattle?*

Since 1 March 2007, Pre-Movement Testing in Wales has included all animals moving from one and two yearly testing herds that are over 6 weeks (42 days) of age.

The “Decision Tree” diagram below should help herd owners to identify if the movement that they are considering requires a Pre-Movement Test. Exemptions will be reviewed during 2009. If further advice is required please contact your local Animal Health Divisional Office.

Cardiff: 02920 768 500                  Caernarfon: 01286 674 144                  Carmarthen: 01267 245 400

If the movement does not fall under one of the exemptions detailed in the diagram, then it is subject to Pre-Movement Testing.

* These requirements are without prejudice to the requirements of the Bovine Semen (Wales) Regulations 2008.
